PROARGI-9+

ProArgi-9+ is Synergy WorldWide's flagship product. It combines the purest, most effective ingredients with revolutionary science to relax your blood vessels and enhance your circulatory system.

Formulated in collaboration with leading doctors and scientists, ProArgi-9+ helps your body increase production of **nitric oxide**, a key signaling molecule that penetrates membranes and regulates the function of your most important cardiovascular cells.

Each key ingredient in ProArgi-9+ has been selected for its ability to reduce stress on your heart and enhance your cardiovascular well-being:

- **L-arginine:** Converts to nitric oxide, a key cardiovascular signaling molecule
- **L-citrulline:** Metabolized to yield more L-arginine, which converts to more nitric oxide
- **Vitamin D3:** Helps maintain the integrity of the entire cardiovascular system
- **Resveratrol:** High in antioxidants, which help protect the heart and reduce LDL oxidation

NOBEL PRIZE-WINNING SCIENCE

Three American scientists were awarded the 1998 Nobel Prize in Medicine for discovering nitric oxide's ability to act as a signaling molecule in the cardiovascular system. The formulation of ProArgi-9+ is built upon this revolutionary research.
